Dear customer,  
thank you for choosing Cangini and Tucci's product.  
In order to improve our service, find listed below the instructions to place your order:

- Always write the code followed by the colour of the glass, example:  
**FLUTE® 1393.1L**  
**glass: TRANSPARENT (01)**
- Specify the finish of the structure (where possible), example:  
**ZOE® 1309MX.3L**  
**ceiling plate: BLACK**
- Specify the colour of the electric cable (where possible), example:  
**ECLISSE® 1293.1L glass TOBACCO (16)**  
**with RED cable**
- Specify if you would like a different lamp holder (where available), example:  
**LARIMA® ~~MINI1253.1L with G9~~**  
**with E14 lamp holder**

For special compositions, it is advisable to consult us for confirmation of the feasibility and price.

Please be informed that the items not included in the catalogue, since out of production, can be still provided on request (if still possible). We invite you to contact the company for a quotation.

The price shown in the catalogue is included of canopy, electric cable and spacers where provided.

To purchase only the canopy/ceiling track/ceiling plate etc. Go to page 62 of the price list.

On request we can provide custom projects.

---

#### ADDITIONAL INFORMATION:

The prices with G9, E14 and E27 lamp holders indicated in the price list do not include bulbs.

Tracks and plates are supplied in POLISHED STAINLESS STEEL.

RESPECT THE COLOUR CHART  
PRESENT IN OUR CATALOGUE  
AVAILABLE FOR EACH PRODUCT

Le lavorazioni e la metallizzazione del vetro di Cangini e Tucci sono interamente realizzate a mano da artigiani esperti. Ogni componente viene scaldato a fiamma e lavorato lentamente dedicando cura e tempo al delicato processo di trasformazione. Il valore aggiunto che questo processo - interamente manuale - conferisce al prodotto è inestimabile. La storia di ogni singolo elemento in vetro è fatta anche di piccole imperfezioni di finitura, di difformità dimensionali impercettibili che attestano la diversità di ogni singolo prodotto e, quindi, la sua unicità.

*The processing and metallization of Cangini e Tucci glass are entirely handmade by expert craftsmen. Each component is heated by flame and worked slowly, dedicating care and time to the delicate process of transformation. The added value that this process - entirely manual - gives the product is inestimable. The history of each individual glass element is also made up of small finishing imperfections, imperceptible dimensional differences that attest the diversity of each single product and, therefore, its uniqueness.*

## GUIDE TO THE METALLISATION CHARACTERISTIC

Zoe Max is a lamp made entirely by hand. The process involved in manually producing a lamp of this size is very complex and requires hours of labour performed by skilled glassblowers. On a surface of such an extent, small imperfections may occur, especially during the finishing or metallisation process. Such imperfections attest to the fact that the product is handcrafted and further increase the value of the lamp. The Cangini e Tucci company does not accept any complaints regarding micro-imperfections on the lamp surface. (Please refer to the specific brochure of reference.)

## LEITFADEN FÜR METALLISIERUNGSMERKMALE

Zoe Max ist eine vollständig von Hand gefertigte Lampe. Die handwerkliche Herstellung einer Lampe dieser Größe ist sehr komplex und erfordert stundenlange Arbeit der Glasbläser. Auf einer Oberfläche dieser Größe können kleine Unregelmäßigkeiten auftreten, insbesondere in der Endbearbeitung oder während der Metallisierung. Diese Unvollkommenheiten beweisen, dass es sich um ein handgefertigtes Produkt handelt, und erhöhen den Wert der Lampe. Die Firma Cangini e Tucci akzeptiert keine Reklamationen bezüglich oberflächlicher Mikrofehler, die die Lampe aufweisen kann. (siehe Referenzbrochure)

# GUIDE TO THE CHARACTERISTICS OF HAND-WORKED GLASS

---

## BOROSILICATE GLASS COATING PROCESS

---

Borosilicate glass is readily available in a transparent form. However, unlike with soda glass, the physical and chemical properties of molten borosilicate glass prevent it from being directly coloured with oxides or pigments. To colour borosilicate glass, known commercially as Pyrex, another method must be adopted. The procedure for achieving this result uses vacuum deposition technology called Physical Vapour Deposition (PVD). With this system, the previously treated glass is introduced into a deposition chamber specifically designed to optimize its processing according to desired specifications. A vacuum is created in this chamber to facilitate deposition on the Pyrex substrate of the desired material, which can be a metal or an oxide, or a combination of both. The minimal thickness of the deposits is such that the coating in question is called a 'thin film', consisting of nano-technological coating deposits at the nanometre scale, which, even if they are metallic, still allow the passage and diffusion of light. Therefore, glass that was previously limited to being transparent, can now assume a finish ranging from a metallic mirror to a transparent colouring effect. This process can be used to obtain various optical effects, since different deposition materials and different thicknesses of the same material will behave differently when light passes through them. In practice, the final effect is rather different from molten batch dye or paint coloured glass. The effect is instead an optical one determined by the type of material deposited and its thickness, meaning that the final product will react differently to different variations and wavelengths of light.

Direct disclosure is prohibited.  
This document provided exclusively for information on the deposition process.

# LEITFADEN ZU DEN MERKMALEN VON HANDGEFERTIGTEM GLAS

---

## COATING VERFAHREN FÜR BOROSILIKATGLAS

---

*Borosilikatglas ist in transparenter Form erhältlich. Wegen seiner chemophysikalischen Beschaffenheit ist diese Art von Glas nur in transparenter Form erhältlich und eine direkte Färbung vom geschmolzenen Glas mit Oxiden oder Pigmenten ist nicht möglich, wie man es normalerweise bei Natronglas macht. Um Borosilikatglas, im Handel auch bekannt unter dem Namen PIREX, zu färben, muss man ein anderes Verfahren anwenden. Um ein solches Resultat zu erreichen, ist eine Unter-Vakuum-Technologie, genannt PVD (Physical Vapour Deposition), das Verfahren, was man einsetzen muss. Bei diesem Verfahren wird das schon vorbehandelte Glas in entsprechende, eigens entwickelte Vakuumkammern gelegt, welche die Behandlung entsprechend den gewünschten Spezifikationen optimieren. In diesen Kammern wird ein Vakuum erzeugt. Das Vakuum ist notwendig, um auf dem Pyrex Substrat das gewünschte Material aufzutragen, welches ein Metall, ein Oxid oder eine Kombination beider sein kann. Die Dicke der Beschichtung ist dergestalt, dass man es als THIN FILM bezeichnet. Tatsächlich handelt es sich hier um Dicken im nanometrischen Bereich. Auf das Glas werden also nanotechnologische Schichten aufgetragen, was selbst bei Metallen auch noch die Diffusion von Licht zulässt, wenn dieses durch das Glas fällt. Das zuvor transparente Glas erhält nun eine Oberflächenbehandlung. Das kann reichen von einer metallischen Spiegelung bis hin zu einer transparenten Färbung. Das Charakteristische dieses Verfahrens ist es, spezielle optische Effekte zu erzielen, weil die unterschiedlichen Materialien ein unterschiedliches Lichtverhalten erzeugen; beim Lichteinfall, und bei unterschiedlichen Dicken desselben Materials resultiert dies unter und bei Lichteinfall in unterschiedlichem Materialverhalten. In der Praxis ist das Endresultat nicht dasselbe, wie bei einem mit Paste oder bei einem mittels Lack gefärbten Glas. Das Resultat ist vielmehr ein OPTISCHER Effekt, der abhängt von der Art des aufgetragenen Materials und von der Dicke dieses Materials. Aus diesem Grund wird man jeweils unterschiedliches Materialverhalten im Endprodukt haben, mit unterschiedlichem Verhalten gegenüber Licht und je nach Wellenlänge des Lichts.*

*Die direkte Verbreitung ist untersagt.  
Das Dokument ist ausschließlich bestimmt als Information zum Beschichtungsverfahren.*

## SPECKS IN THE GLASS

Small dots on the glass are to be considered part of the craftsmanship process. Despite careful quality checks of the glass, small imperfections that are initially invisible to the naked eye may emerge during blowing.

## KLEINE PUNKTE AUF DEM GLAS

*Kleine Punkte auf der Oberfläche des Glas sind merkmale der Handwerkskunst zu berücksichtigen. Trotz sorgfältiger Qualitätskontrolle des Glases könnten beim Blasen kleine Unvollkommenheiten auftreten, die für das bloße Auge zunächst unsichtbar sind.*

## “IMPERFECTIONS” IN THE GLASS

The welding and workmanship of our glass is made entirely by hand. It could happen that bubbles appear at the junction points, or more or less obvious thicknesses, which we do not consider defects, but further attest to the authenticity of the craft work.

## „UNVOLLKOMMENHEITEN“ DES GLASES

*Das Schweißen und die Verarbeitung von unseren gläsern werden ganze Handgemacht. Bläschen könnten in dem verbindungspunkt der gläsern erscheinen; mehr oder weniger unterschiedliche Dicke könnten bestehen. Wir erwägen den keinen Fehler, sondern weitere authentische zeichen vom Handwerksprozess.*

## SURFACE COLOUR

The glass tonality of the metallization is the result of an elaborate handicraft process, it is not a RAL colour, the composition is made using a special chemical process in order to obtain the mirror-smooth effect, therefore slight differences in color or different shades are inevitable.

## FARBE DER OBERFLÄCHE

Wie oben beschrieben die Glastonalität der Metallisierung ist das Ergebnis von einem aufwendiges Handwerksprozess, es ist keine RAL Farbe die Zusammensetzung erfolgt mit einem besonderen chemischer Verfahren um gleichseitig das spiegelglatt Effekt zur bekommen, die Auftragung der Beschichtung erfolgt durch eine Blitz verfahren kann keine gleichmäßige Verteilung der Farbe sein daher sind leichte Farbe unterschiede oder unterschiedlicher licht Nuancen unvermeidbar.

## METALLIZATION

Small dots, marks and optical effects (invisible when the light is off), could emerge when switched on.

## METALLISIERUNG

Kleine Punkte, Unreinheiten (unsichtbar wenn das Licht aus ist), können durch anschalten der leuchte erscheinen.

## DECOR

The decoration is made entirely by hand according to a design approved by the Van Gogh Museum and irregularities may appear in the execution.

## DEKOR

Die Dekoration wird vollständig von Hand nach einem vom Van Gogh Museum genehmigten Design hergestellt, und bei der Durchführung können Unregelmäßigkeiten auftreten.

## WE REALIZE CUSTOMIZED PROJECTS

Please contact the technical office by email at the address [info@canginietucci.com](mailto:info@canginietucci.com) for a quote.

Upon request, we can supply customized plates and tracks of the diameter or length you need, and with a number of different outputs depending on the composition.

As an alternative to special plates and tracks, there is the possibility of closing the holes with a plug of the same colour of the structure.

## CONDITIONS OF SALE

---

The current price list replaces all previous ones.  
The prices are in € EURO without VAT.

### **PACKAGING**

Packing costs in cardboard boxes are included in the price.

### **ORDERS**

Cancellations of already sent and confirmed orders are not accepted except for written arrangements between the parties.  
Cancellations of orders concerning special fixtures are not accepted.  
The company reserves the right to make design changes to improve the products at any time and without notice.

### **COMPLAINTS AND RETURNS**

The company is not responsible for possible breaks or losses during the transportation of its products. Any possible complaint will have to be submitted within eight days from the receipt of the goods by registered letter or by fax or by e-mail. Return of materials is not accepted unless authorized in writing beforehand; the goods have to be delivered in perfect conditions, not being used and into their original packages.  
The client must CHECK the PACKAGING INTEGRITY. In case of missing signature “goods accepted under reserve” on the document, the goods will not be replaced.

### **RESERVE OF PROPERTY**

The manufacturer is the owner of the goods till they have been fully paid.

### **FURTHER CLAUSES**

The prices with E14 E27 and G9 lampholder indicated in the pricelist do not include bulbs.  
The company doesn't sell bulbs.  
All models are in compliance with legal standards and regulations.  
We do not take the responsibility for damages resulting from the improper use of the devices.
